Massimiliano Fanni Canelles

DOCTOR- JOURNALIST- PROFESSOR

www.fannicanelles.com

About me

Currently **Deputy chief at the Acceptance and Emergency Ward** of the "Franz Tappeiner" Hospital in Merano in the Südtiroler Sanitätsbetrieb - South Tyrolean Health Service.

Currently at the forefront of clinical management and the Coronavirus emergency organisation.

Doctor specialized in internal medicine and nephrology, since January 2016 appointed by the Integrated University Health Authority of Udine as responsible for the management of the SOS of the Hospital of Cividale del Friuli of Nephrology and Dialysis. Since March 2019 Head of SOS (simple operational structure) of Nephrology and Dialysis of the Hospital of Cividale del Friuli, Integrated University Hospital of Udine.

Journalist since 1994, founder and director of **Socialnews**, magazine of geopolitics and health under the patronage of RAI, newspaper registered in 2004 by the Court of Trieste and recognized as Best European editorial product by Euromediterraneo-Confindustria. **Lecturer of the International Health cooperation Course at the AlmaMater Studiorum, University of Bologna.**

National president of the Italian Myelin Project Committee (CIPIM). CIPIM is the Italian part of Myelin Project U.S.A. that supports research for therapy in demyelinating diseases.

Founder of @uxilia Onlus in 2004 and its president since 2008. Since 2014 **founder and president of Auxilia Foundation**, specialised in health cooperation and international diplomacy. Both the Onlus and the Foundation promote international cooperation in developing countries involved in armed conflicts with the construction of health centres and hospitals.

As hospital manager, I applied innovative transverse managerial techniques called "TEALS" associated to the behavioural characteristics of the enagram and to the logic of gamification. The horizontal organization, through the delegation of responsibilities and the creation of cohesive and performing working-groups has led – with the same budget and staff – to improved performance and has increased the quality of life for both staff and users: a winning and repeatable model.

Guest speaker at **TEDx Udine** to present this model and experience.

Work experience

International Diplomacy

Professor Fanni Canelles has experience of international cooperation in international negotiations in the context of war and natural disasters. In particular Afghanistan, Iraq, Palestine, Somalia, Sudan, Syria, Pakistan, Srilanka.

In 2003, during the Second Gulf War, he worked with the Iraqi Ministry of Health to restore the functioning of the Al Mansur Children's Hospital in Baghdad. In the same period, with the Italian delegation in Iraq, he took part in activities to bring seriously ill children to Italy so that they could have the necessary care.

In 2004 in Sri Lanka, on behalf of the International Institute of Human Rights, he set up an observatory to monitor economic aid to populations devastated by the tsunami and to report child abuse in the country. In 2005 he organized a joint and concerted mission with the Italian Ministry of Foreign Affairs and the Decentralized Cooperation of Friuli Venezia Giulia to organize the activities necessary for the liberation of children unjustly imprisoned in Colombo prison. He later redacted a report for the Ministry of Foreign Affairs on early recruitment for military purposes, sexual abuse and restrictions on the liberty of children accused of petty crimes.

In 2010, he obtained an agreement with the Government of Sri Lanka to bring a number of child soldiers to Italy with the aim of carrying out highly specialized surgical operations to restore the functioning of limbs impaired in battle. In 2012, he obtained funding and government concessions for the construction of the Vocational Training Centre, a centre for the recovery of child soldiers and women who have suffered violence in Tamil territory, the scene of the clash of the guerrillas of the LTTE (Tamil Tigers). In 2013, he obtained from the advisor of the President of Sri Lanka permission to act for the protection of former child soldiers and women who have suffered violence during the war.

In 2013 he participated in international agreements to allow the sending and passage in Syrian territory of humanitarian convoys to supply the refugee camps of Atma and Aleppo and to bring to Italy children in need of highly specialized medical and health interventions.

In 2014 he participated in missions to Syria, the Balkans and Asia to oversee ongoing projects and to bring children in need of highly specialized medical and health care treatments to Italy

In 2016/17, he intervened in Syria and during the war he made telemedicine connections between the hospital in Udine and 17 Syrian health centres.

Managerial skills

Ability to motivate employees, problem solving and management of complex organizations, negotiation, application of the Teals business method. Since January 2016 he has been appointed by the Integrated University Health Authority of Udine as responsible for the management of the SOS (simple operational structure) of the Hospital of Cividale del Friuli of Nephrology and Dialysis. Thanks to innovative transversal management techniques called Teals, SOS, with the same budget and staff, acquired not only hemodialysis, but also peritoneal dialysis and some processes of territorial telemedicine. Outpatient activities increased exponentially, today with more than 20,000 services; an important preventive health activity has been set up and becomes a reference centre for the territory and integrated activities with general practitioners and territorial and district centres. In the centre he runs, 56 haemodialyzed patients and 10 patients on peritoneal dialysis are followed, more than 2,000 patients with nephrological pathologies, hypertensive diseases, hyperparathyroidism, urinary calculi and diseases of bone metabolism such as osteoporosis. As part of a specialized prevention service, patients with preuremic renal failure are followed with particular attention in an outpatient clinic dedicated to slowing down the evolution of terminal renal failure with excellent results.

Founder and President of @uxilia that has signed memoranda of understanding with the Department of Juvenile Justice of the Ministry of Justice, Department of Civil Liberties and Immigration of the Ministry of the Interior, Ministry of Labour and Social Policies. It has been a member of the National Volunteer Observatory. It has stipulated further memoranda of understanding with the Court of Udine and with numerous universities. @uxilia Onlus founded in 2014 @uxilia Foundation with an endowed capital not available in works of art of 300,000 euros. Abroad, they both are engaged in international cooperation, in developing countries which are involved in armed conflicts, with the construction of health centres, schools, orphanages and with pedagogical vocational training activities dedicated to child soldiers and women to support their emancipation. Most of the activities take place in the field of diplomacy and international negotiation. The territories are central Africa, the Middle East and Asia. In Italy the activities of @uxilia are carried out within the framework of territorial social needs such as addiction, in particular the fight against doping, gambling, digital addiction, alcohol abuse and drug use.
